

Manuscript to be considered as a formal paper in the Special Issue of IEEE Transactions on Plasma Science for APSPT-10

The 10th Asia-Pacific International Symposium on the Basics and Applications of Plasma Technology is honored to announce that the Symposium will cooperate with **IEEE Transactions on Plasma Science** to publish a special issue of the journal after the Symposium, and it will be dedicated to highlighting the top-quality and premier plasma science technology research reported at the APSPT-10. Authors submitting their abstracts will have a great chance to be invited to contribute to the special issue of IEEE Transactions on Plasma Science!

● **About the IEEE Transactions on Plasma Science**

Aims & Scope

IEEE Transactions on Plasma Sciences focuses on plasma science and engineering, including: magnetofluid dynamics and thermionics; plasma dynamics; gaseous electronics and arc technology; controlled thermonuclear fusion; electron, ion, and plasma sources; space plasmas; high-current relativistic electron beams; laser-plasma interactions; diagnostics; plasma chemistry and colloidal and solid-state plasmas.
